**Sheer
Driving Pleasure**

**Now there is a cockpit appropriate
for Business Class.**

Equipment.

■ **Xenon headlights** for low and high beam, incl. automatic headlight range control. Xenon headlights offer a very high standard of light intensity and a very smooth, consistent spread of light on the road.

□ **Adaptive Headlights** illuminate curves ahead by electromechanical control of the moving headlights as soon as the driver turns the steering wheel.

□ **High-beam assist** supports the driver at night by automatically dimming the headlights for oncoming traffic, when approaching vehicles up ahead, where there is sufficient street lighting.

■ **Rear trim strip** in Chrome. Positioned on the rear lid directly above the number plate panel, this trim strip accentuates the elegant contours of the rear section. On models featuring the 7 Series Sports Package or high-gloss Satin Chrome the rear trim strip is finished in body colour.

■ **Fog lamps** integrated in the front air dam. For extra safety in bad weather and with poor visibility. Ellipsoid free-form technology ensures a very homogeneous spread of light on to the road.

■ **Exterior mirrors** finished in body colour, electrically adjustable. The mirrors are blue-tinted, aspheric in design and come with active heating geared to the outside temperature. With their integrated fold-in function, both exterior mirrors move in electrically and fold out again at the touch of a button.

□ **Comfort Access** allows you to enter and start your car without using a key. All you need is the remote control checking your access and driving authorisation by wireless communication. This is done automatically once you touch the outer door handle and press the start/stop button.

■ **Infinitely variable door restrainers** hold the door in any position, preventing the door from swinging in and out and thus avoiding possible damage.

□ **Soft Close Automatic** uses electric power to gently close all four doors (on the last 6 mm, standard on the 760i/Li).

□ **High-gloss Satin Chrome.** The black surrounds on the side windows, the door trim strips inside as well as the rear trim strip in body colour give your BMW a discreet but sporting touch.

■ **Light-alloy wheels, styling 165,** 8 J x 17 inch, 245/55 R 17 tyres.

□ **Light-alloy wheels, double-spoke 174,** 8 J x 18 inch, 245/50 R 18 tyres.

□ **Light-alloy wheels, star-spoke 175,** 8 J x 18 inch, 245/50 R 18 tyres (standard on the 745d).

□ **Light-alloy wheels, star-spoke 231,** with mixed tyres, 9 J x 19 inch with 245/45 R 19 tyres at the front, 10 J x 19 inch with 275/40 R 19 tyres at the rear (only available in combination with the Special Edition Exclusive).

□ **Light-alloy wheels, star-spoke 95,** with mixed tyres, 9 J x 19 inch with 245/45 R 19 tyres at the front, 10 J x 19 inch with 275/40 R 19 tyres at the rear.

□ **Light-alloy wheels, spoke styling 176,** with mixed tyres, 9 J x 19 inch with 245/45 R 19 tyres at the front, 10 J x 19 inch with 275/40 R 19 tyres at the rear.

□ **Light-alloy wheels, Y-spoke 149,** with mixed tyres, 9 J x 20 inch with 245/40 R 20 tyres at the front, 10 J x 20 inch 275/35 R 20 tyres at the rear.

■ **Multifunction steering wheel** for convenient operation of numerous functions without being distracted from road traffic – which means you keep your hands on the wheel all the time. The set of buttons on the left is for all telephone functions (receiving and ending phone calls, voice control and hands-free operation) as well as radio volume control. The buttons on the right activate the Steptronic function, the sports program, and the radio search mode. One button can be freely programmed, for example for repeating navigation messages.

□ **Leathersports steering wheel** with three spokes and integrated buttons for controlling, e.g., Steptronic or the radio while keeping your hands safely on the steering wheel.

■ **Info Display** in analogue (mechanical indicators) and LCD technology (displays) glare-free for clear presentation of data – for example by retrieving data from the computer or navigation system. Depending on brightness, the display changes colour and brilliance for optimum clarity.

■ **Steptronic** on the six-speed automatic transmission. The buttons integrated in the steering wheel allow you to shift gears manually in the Steptronic mode without taking your hands off the steering wheel – an important asset for extra safety. Two buttons at the front are for shifting down, two at the rear for shifting up.

■ **Six-speed automatic transmission** with Steptronic. You operate the transmission via the switch on the steering column or, when in position D, by the Steptronic buttons on the steering wheel.

■ **Control Display** with 6.5-inch screen in LCD technology presenting functions operated by the Controller, such as information from the on-board computer or radio settings.

□ The **Control Display** is available as an option in conjunction with the navigation system or TV function, incorporating an 8.8-inch LCD screen and the same range of functions.

□ **Navigation system*** presenting information in the glare-free 8.8-inch Control Display incl. BMW Professional radio. Wide range of navigation data available on DVD. Driving information provided by the voice computer, further data added by the direction arrow (on the Info Display) or map (standard on the 760i/Li).

□ **TV function.** Whenever the car is at a standstill, the driver can use the Control Display as a television set. The system can receive terrestrially broadcast analogue and digital television signals.

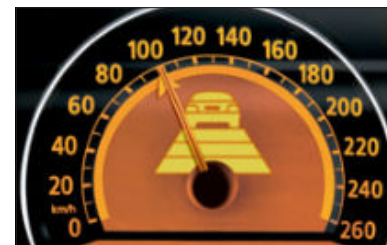

■ **Condition-Based Service** monitors and calculates the condition of various components subject to wear such as the brake pads and spark plugs as well as operating fluids such as the engine oil and coolant, presenting the relevant data in the Info Display. This determines when the car requires service.

■ **Controller** serving as the principal iDrive entry unit (for the driver and front passenger). Operating this rotary/push button intuitively with just one hand, you activate numerous functions presented on the Control Display. The menu button takes you straight to the main menu, the second button is freely programmable.

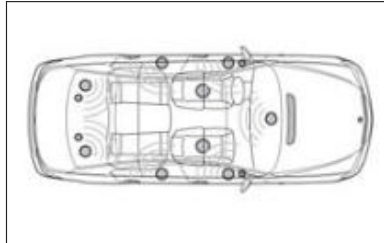

□ **Voice control** for the telephone, navigation unit, notebook and telephone directory functions. Voice control helps the driver while on the road and ensures extra safety, superior comfort and easy control.

□ **Active Cruise Control** for cruising in genuine style at a pre-selected speed. When driving in motorway traffic, your BMW will adjust its speed automatically to a slower vehicle ahead, consistently maintaining the distance set in advance.

□ **HiFi loudspeaker system** with 240 W amplifier output and eight loudspeakers (central bass concept). Ensures well-balanced sound, supreme dynamic audio quality and excellent sound distribution largely unaffected by road speed (standard on the 740i/Li, 750i/Li and 745d).

□ **HiFi system Professional LOGIC7** providing an unprecedented sound experience. Nine terminal stages with a total output of 420 W and 13 loudspeakers ensure perfect surround sound. The central bass concept guarantees highly authentic reproduction of all bass sounds by the subwoofers in the side-sills (standard on the 760i/Li).

■ **Radio BMW Business CD** with diversity aerial, automatic volume control, power-assisted CD insert/eject, connection for BMW CD changer.

□ **Radio BMW Professional CD.** More equipment than BMW Business CD radio: e.g. two-tuner frequency diversity (standard on the 760i/Li).

□ **MD player for BMW Business radio.** Same features as BMW Business CD, but with integrated MD player (minidisc), power-assisted MD insert/eject.

□ **DAB-tuner** for additionally receiving digital radio programs.

□ **Garage door opener** for additional convenience. The ideal self-learning remote control opening and closing your garden gate or garage door directly from the car.

■ **Window lifts**, electric, front and rear, with control buttons in the armrests. Open/close fingertip control front and rear, trap release and comfort closing function all-round.

■ **AUX-IN socket in front armrest** for connecting an external audio source, e.g. MP3 player.

■ **Seat adjustment**, electric, for driver and front passenger. Ensures very convenient adjustment for length and height, as well as adjustment of the backrest angle. Standard on the 750i/Li, 760i/Li and 745d with memory function for two individual positions on all driver's seat and exterior mirror settings.

□ **Comfort seats** at the front (standard as the 760i/Li), electrically adjustable with multi-function control of seat fore-and-aft position, seat angle, headrest position, backrest angle, seat height and active headrests for the driver and front passenger. Also include lumbar support, seat depth adjustment, backrest width adjustment and memory function for both rear-view mirrors plus the offside mirror automatically tilting down when backing up. Available only in conjunction with Nasca leather (standard on the 760i/Li) or Full leather Club.

□ **Active seats** for the driver and front passenger providing a relaxed seating position even on long distances. With the seat bottom moving up and down cyclically on either side, your pelvis and lumbar spine are mobilised intermittently.

□ **Comfort seats** at the rear, electrically adjustable. Complete with electric headrests and cupholders at the rear as well as belt force limiters and belt latch tensioners for the outer seats. Available only in conjunction with Nasca leather (standard on the 760i/Li) or Full leather Club.

Automatic air conditioning with an extended range of functions: Automatic Air Recirculation and anti-mist sensor providing your preferred climate inside the car quickly and efficiently, keeping the temperature set at a steady level separately for the driver and front passenger (standard on the 760i/Li).

■ **Armrest** at the front, padded, with temperature-controlled storage compartment (depending on equipment up to 8.5-litre capacity) and switch locking/unlocking the luggage compartment.

■ **Glove compartment**, illuminated, integrated 12V socket.

■ **Innerdoor handles** for opening the doors, illuminated at night.

Glass roof, electric, with fingertip control of sliding and vent function, trap release and comfort opening/closing.

Sunblind for the rear window, electric, ensuring optimum protection from sunglare and a high level of privacy inside your 7 Series (standard on the 750i, 760i and 745d).

Sunblinds for the rear window and rear side windows, electric (standard on all long-wheelbase models).

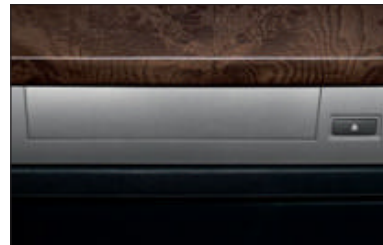

■ **Remote control** incorporating radio signal operation, electronic immobiliser, self-charging battery with electronic charge unit and integrated manual key.

Mobile phone preparation with Bluetooth interface (incl. hands-free facility, charger connection and exterior aerial). A compatible phone can be connected using a snap-in adapter (available separately), allowing control via the multifunction steering wheel (standard on the 760i/Li). For more information visit www.bmw.com.

Separate car telephone at the rear (not available in conjunction with Tatami wool).

CD changer fitted above the glove compartment for easy and convenient use. Accommodates up to six CDs and is also MP3 compatible.

DVD changer for up to six CDs or DVDs, fitted at the side in the luggage compartment.

■ **Vanity mirror**, centrally positioned in the rear roof lining, turnable and illuminated.

Comfort features

The BMW 7 Series offers the most exquisite and sophisticated options for rear-seat passengers looking for the very best in motoring comfort. One of these special features is the combination of electrically adjustable rear seats with separate electric adjustment of the backrests and headrests. Further luxury options are the second handset at the rear for the mobile phone preparation, the display monitor with its extra-clear 16:9 aspect ratio, and a spacious cooling box.

Sitting in the rear of the long-wheelbase version of the BMW 7 Series, you will enjoy optimal legroom and, as a result, supreme seating comfort even on long distances. Fitted as standard, the self-levelling pneumatic rear suspension also makes a significant contribution to outstanding comfort and luxury on the road. The final touch is then provided by rear-seat air conditioning with climate zones individually adjustable on either side, naturally quite independent of the air conditioning at the front.

The rear seats offer particularly ample space, with the body of the Li/Ld versions extended in length by 14 cm or 5.5 inches, serving in particular to maximise legroom at the rear. Using the Controller fitted in the centre console and the rear monitor (the Controller is featured on all models fitted with a rear monitor), you can conveniently operate a whole range of different functions such as the TV.

Controller offering the rear-seat passengers special comfort. Whether you use the TV function on the 16:9 monitor above the centre console or the optional DVD player, you can control numerous functions easily with just one hand (Controller included on models equipped with a rear monitor).

Rear-seat monitor. Using the 16:9 screen, you can conveniently control the radio or HiFi loud-speaker systems, the navigation system and the TV function as well as the optional internet-based services (even while driving). This option includes a Controller at the rear.

Cooling box. The electrical cooling box opening up from inside the car once you fold down the centre armrest offers space for two bottles. (This feature significantly reduces the space available in the luggage compartment.)

Rear-seat air conditioning controlled from two consoles in the roof lining left and right. Passengers sitting at the rear are able to choose their desired temperature, with additional air flowing out of the roof nozzles left and right. This option includes a cooling box.

The 760i/Li – exclusive features.

Light-alloy wheels, star-spoke 91, 8 J x 18" rims with 245/50 R 18 tyres.

Chrome-plated V12 logo in the front side panels, discreetly bearing testimony to the 12-cylinder power unit.

The top model in the BMW 7 Series range, the 760i/Li, is distinguished by a whole series of exclusive features. Outside, the 12-cylinder is characterised by exclusive light-alloy wheels in star-spoke 91 design as well as the chrome-plated V12 logo. Inside, you will find a wide range of leather upholstery, high-gloss interior trim in Burr Walnut with fine inlays, and roof lining in Alcantara leather.

Instrument panel finished in Nasca leather or Full leather Club exclusively on the 760i/Li, depending on interior features.

Door sills, with polished chrome insert and illuminated V12 logo in Chrome.

Interior trim in Burr Walnut, high-gloss, with inlays. The interior trim is specifically matched to the unique class and character of the 760i/Li.

Interior grab handle finished in finest Nasca leather and featuring Burr Walnut inlays. Roof lining in Alcantara leather underlines the exclusive character of the 760i/Li.

All dimensions of drawings in millimetres. Luggage compartment capacity 500 litres to VDA standard. Figures in () apply to the 730Li, 740Li, 750Li, 760Li and 730Ld.

¹ The figure quoted includes a 90 per cent tank filling, 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles in standard trim. Special equipment may increase this figure.

² All engines comply with the EU4 standard. Fuel consumption is determined in accordance with the ECE driving cycle (93/116/EC) made up of approximately one-third urban traffic and two-thirds extra-urban driving (related to the distance covered). CO₂ emissions are measured in addition to fuel consumption. Fuel consumption is determined on cars with standard equipment. Special equipment such as wider tyres may have a significant influence on fuel consumption.

³ The petrol engines run on RON 98 fuel. They may also be run on RON 91 with a slight decrease in output.

⁴ Available exclusively with automatic transmission.

⁵ Electronically limited.

CO₂ emissions and fuel consumption may vary by country.

BMW Recycling.

Your BMW is the product of a comprehensive recycling concept. But what exactly does that mean in practice? It means that all the requirements of recycling are taken into account from the start, in the initial development of a BMW. One example is the choice of materials carefully selected to preserve resources and ensure efficient recycling compatible with the environment. Each BMW is designed and built for simple and economic recycling after its – long – running life. We have been collecting the know-how required for this purpose ever since 1994 at the unique BMW Recycling and Dismantling Centre (RDC) near Munich. So please contact your BMW partner on all matters regarding your end-of-life vehicle. He will be happy to advise.

Printed on environmentally-friendly paper made from chlorine-free bleached pulp.

The models illustrated in this brochure show the specifications for the German market. In part, they include optional equipment and accessories not fitted as standard.

According to the specific requirements of other markets, alterations in models, standard and optional equipment, as described in the text and illustrations, may occur. For precise information, please contact your BMW partner. Subject to change in design and equipment.
